PERSONAL PROFILE

First Class BSc (Hons) Computing graduate (Arden University, 2025), studied in the evenings across four years while working full time. My final-year project — a role-based events portal in PHP and MySQL — was graded First Class and scores 100 for accessibility in Lighthouse. A storefront I built for a decorations business has been live on its own domain since August 2026 and scores 100 for both accessibility and best practices.

Before this, twenty years in retail and warehouse operations, ten of them managing — eight running a BILLA supermarket with 40+ staff and its monthly budget. My development experience is academic and self-directed rather than commercial: graded, tested, and in two cases running in production.

TECHNICAL SKILLS

Comfortable — HTML, CSS, JavaScript, Tailwind CSS, PHP, MySQL, SQL

Working in — React, Vite, Node.js, Express.js, MongoDB, PostgreSQL, Git, GitHub

From the degree, graded but not commercial — Java (OOP), Python for data science (pandas, scikit-learn), Azure (App Service, VNet, MySQL Flexible Server), Oracle APEX, XAMPP

Practices — Accessibility to WCAG (axe, WAVE, Lighthouse), automated testing (Vitest), MVC, full SDLC, PRINCE2, Git workflow

Learning now — TypeScript, Next.js, ORMs, REST API design

PROJECTS

Moss Decorations — storefront

`Live since Aug 2026`

mossart.spireforge.co.uk

`React 19 · Vite · Tailwind CSS · Express · MongoDB · Vitest`

- Built and shipped independently from brief to production for a preserved-moss decorations business; deployed as a Cloudflare Worker on its own domain.
- Scores 100 for accessibility and 100 for best practices in Lighthouse on the live site.
- Five routes, each its own chunk. Filtering and sorting held in the URL, so a filtered view can be shared and the back button undoes it.
- 196 tests across 33 files, including a colour-contrast check that computes ratios from the design tokens and fails the build below the WCAG floor.
- The Express API is half-built: authentication works, the product and order routes are still stubs.

Manchester Event Portal — final-year project

`First Class · 2025`

Repository private as assessed coursework — full report and walkthrough available on request

`PHP · MySQL · Tailwind CSS · PDO · PHPMailer`

- An events platform for three roles — visitors, organisers and admins — each with its own dashboard, built across the full SDLC from requirements gathering to testing.
- 125 PHP files in a strict controller/model/view split; every query a prepared PDO statement, passwords hashed with bcrypt at cost 12, sessions hardened with strict mode, regeneration and a 30-minute timeout.
- Favourites, notifications, audit logging, image uploads, and a scheduled job that emails users before an event they saved.
- Tested rather than assumed: axe and WAVE for accessibility, Lighthouse for performance — 100 accessibility, 84 performance, zero layout shift.

WorldQuiz

`Level 6 coursework, being rebuilt`

github.com/STL73/WorldQuiz

`PHP · MySQL · JavaScript · CSS`

- A geography quiz over 46 landmarks with a token economy, server-side progress and role-gated admin dashboards for managing questions and users.
- Three-layer architecture with account creation and user/admin roles; deployed on the university's hosting. Currently being redesigned.

Personal portfolio 2026

spireforge.co.uk · github.com/STL73/MyPortfolio

`React 19 · Vite · Tailwind v4 · GSAP`

- Designed and built against a self-authored design system, with self-hosted subsetted fonts and everything below the fold code-split behind a Suspense boundary.
- Scroll animations that respect `prefers-reduced-motion`.

EDUCATION

BSc (Hons) Computing — First Class 2021 – 2025

Arden University, Manchester · Overall mark 77.7

- **Level 6** — Computing Project (the events portal above), Web Application Development, Distributed and Cloud Computing (Azure App Service, virtual network with private endpoints and network security groups), Data Mining (Python: linear regression and Random Forest), Managing Innovation and Change.
- **Level 5** — Object-Oriented Programming in Java, Advanced Databases (MySQL: views, stored procedures, triggers, transactions), System Analysis and Design, Data Analysis and Visualisation, Human Computer Interaction, IT Project Management (PRINCE2).
- **Levels 3–4** — foundation year, then Web Authoring, Programming in Java, Databases (Oracle APEX), Computer Systems and Security.

WORK EXPERIENCE

Warehouse Operative Jun 2018 – Present

Great Bear Distribution — Salford, Manchester

- Eight years in a high-volume logistics operation, meeting daily throughput targets on rotating shifts and running scanning and inventory systems at a low error rate.
- Completed the entire Computing degree during this period — four years of evening study alongside full-time shift work, without reducing hours.

Relocation to the UK — seasonal, production and warehouse roles Sep 2016 – May 2018

Various employers — Manchester area

- Moved to the UK and worked continuously through agriculture, food production and warehousing while settling in a new country.

Store Manager Aug 2008 – Aug 2016

BILLA Bulgaria — Varna, Bulgaria

- Managed 40+ staff across all departments: scheduling, performance reviews and daily operations.
- Controlled the monthly operations budget, identifying and resolving financial discrepancies to deliver positive results.
- Opened a new store from the ground up — recruited and trained the staff and oversaw the full operational setup.

Department Manager Jun 2006 – Jul 2008

KAUFLAND Bulgaria — Varna, Bulgaria

- Managed 10 direct reports plus inventory and receiving, building daily and weekly sales plans from trend data.

CERTIFICATIONS & LANGUAGES

Full UK Driving Licence · Arden Achieve Award, Arden University (2023) · transcript, diploma and certificates downloadable at spireforge.co.uk

English — professional working proficiency · **Bulgarian** — native
